

Partner Name	: MY LYF Care	Barcode	: E5346342
Patient Name	: Priyedarshi Sharma	Sample Collected On	: 17/May/2025 12:16PM
Age/Gender	: 13Y OM OD /Male	Sample Received On	: 17/May/2025 03:42PM
Order Id	: 13742209264	Report Generated On	: 17/May/2025 05:10PM
Referred By	: Self	Sample Temperature	: Maintained ✓
Customer Since	: 17/May/2025	Report Status	: Final Report
Sample Type	: Whole Blood EDTA		

## DEPARTMENT OF HAEMATOLOGY

Test Name	Value	Unit	Bio. Ref Interval
-----------	-------	------	-------------------

## Blood Group (ABO and Rh Typing)

## BLOOD GROUP TYPE

AB

Method: Tube &amp; Slide Agglutination

## Rh TYPE

Positive

Method: Tube &amp; Slide Agglutination

ABO remains the most important in transfusion and transplantation since any person above the age of 6 months possess clinically significant anti-A and/or anti-B antibodies in their serum. Blood group A contains antibody against blood group B in serum and vice-versa, while blood group O contains no A/B antigen but both their antibodies in serum.

Rhesus-system is the second most important blood group system after ABO. In contrast to the ABO system, anti-Rh antibodies are, normally, not present in the blood of individuals with D-negative RBCs, unless the circulatory system of these individuals has been exposed to D-positive RBCs. These immune antibodies are immunoglobulin G (IgG) in nature and hence, can cross the placenta. Prophylaxis is given against Rh immunization using anti-D Ig for pregnant Rh-negative mothers who have given birth to Rh-positive child.

Historical Record check : ABO/ Rh grouping results should be correlated with previous records and patient/ doctor is requested to correlate ABO/Rh testing results with previous results if available.

Dr. Sakesh Agarwal  
MBBS, DCP  
Consultant Pathologist, Healthians Labs

SIN No:E5346342

### Terms & Conditions:

- 1) Machine Data is available for last 7 days only. In case of manual testing & outsourced testing, machine data will not be available.
- 2) CBC parameters may vary when it is manually reviewed by the Pathologists.
- 3) **For Thyroid tests** - Circulating TSH shows a normal circadian rhythm with a peak between 11pm-5am and a nadir between 5pm-8pm. TSH values are also lowered after food when compared to fasting in a statistically significant manner. This variation is of the order of  $\pm 50\%$ , hence time of day and fasting status have influence on the reported TSH level.
- 4) **For Lipid profile** - Lipid and Lipoprotein concentrations vary during the normal course of daily activity. Also, certain drugs, diet and alcohol can have lasting effects on Triglyceride levels. To obtain best results for Lipid testing, a strict fasting of 10-12 hours with a light meal on the previous night is recommended.
- 5) Test results released pertain to the specimen submitted.
- 6) Test results are dependent on the quality of the sample received by the Lab.
- 7) The tests are carried out in the lab with the presumption that the specimen belongs to the patient named or identified in the bill/test request form/booking ID.
- 8) The reported results are for information and are subject to confirmation and interpretation by the referring doctor to co-relate clinically.
- 9) Test results may show interlaboratory variations.
- 10) Liability of Healthians for deficiency of services or other errors and omissions shall be limited to the fee paid by the patient for the relevant laboratory services.
- 11) This report is not subject to use for any medico-legal purposes.
- 12) Few of the tests might be outsourced to partner labs as and when required.
- 13) This report is not intended to replace but to lead by providing comprehensive information. It is recommended that you consult your doctor/physician for interpretation of results.
- 14) All reports might not be applicable for individuals less than 18, pregnant women or individuals suffering from diseases for which health test has not been performed or symptoms not diagnosed.
- 15) This report is based on preventive health test screening and is meant for a healthy lifestyle. It does not provide any recommendation for life threatening situations.
- 16) It is strongly recommended to take required precautions for allergic reactions or sensitivities.
- 17) Authorised partner labs as mentioned for certain tests are as below:  
HL/PL/001- Metropolis Healthcare Ltd  
HL/PL/002- Thyrocare technologies Limited  
HL/PL/003- Lifecell International Pvt. Ltd. - Laboratory Services  
HL/PL/004- Modern Diagnostic & Research Centre

### About Healthians Labs

## How we control Report Accuracy at Healthians

#### Quality Control

We follow Quality control to ensure both **precision & accuracy** of patient results.

#### Machine Data

We save patient's result values **directly from machines** ensuring no manipulations & no fake values.

#### QR Code

QR Code based authenticity check on all its reports

#### Calibration

We make use of calibrators to evaluate the **precision & accuracy** of measurement equipment.

#### Equipment

Our Labs are equipped with state-of-the-art instruments with **cutting edge technology** to provide faster & reliable results.

#### EQA

Our Labs participate in EQA & show proven accuracy by checking **laboratory performance** through external agency or facility.
